## Photography Courses

Our hands-on photography course will give you the technical skills to capture stunning images across a range of areas including: studio shoots, landscape photography, fashion, fine art, editorial and video using a digital SLR camera. You will learn photo composition, lighting techniques, image enhancement and post-production processes using the latest industry software Adobe CC Photoshop. You will communicate your creative ideas and develop your own professional portfolio of work for print and digital publication.

This course offers regular location photo shoots, which will give you amazing opportunities for your portfolio development. An emphasis on industry involvement and project work is encouraged to help promote networking opportunities. With the knowledge gained you will be well prepared to begin and build a career in the photography and digital image industry.
